

Cooperation Profile

Date of Submission: 11-07-2024

Relevant topic(s) in the work programme (call identifier & name of the topic(s))

HORIZON-CL4-2024-HUMAN-03-01: Advancing Large AI Models: Integration of New Data Modalities and Expansion of Capabilities (AI, Data and Robotics Partnership) (RIA)

Description of your expertise (up to 1000 characters)

Involved in FP7 (EmerGent), Horizon2020 (LINKS, eNOTICE) and Horizon Europe (SYNERGIES) projects in Cluster 3 since 2010, as coordinator and Work Package leader. Our expertise lies in the identification of needs of practitioners and the mapping to technological potentials. By developing and implementing technological solutions embedded in a participatory approach, we validate and evaluate the impact of the results. We offer a strong network to practitioner organisations Europe-wide and several multipliers. We would be interested to work on a pilot/case focusing on civil safety to strengthen the use of AI solutions.

Keywords describing your expertise (up to 10 key words)

civil safety, knowledge base, AI supported solutions, LLM experiments, support for practitioners in the civil safety domain, co-design and co-development, user-centred evaluation

Organisation information

Organisation: safety innovation center gGmbH
Type of organisation: <input type="checkbox"/> Industry (Large) <input type="checkbox"/> Industry (SME) <input type="checkbox"/> University or College <input checked="" type="checkbox"/> Research Institute <input type="checkbox"/> Public Body <input type="checkbox"/> Other
Previous participation in an EU project? <input type="checkbox"/> No <input checked="" type="checkbox"/> Yes: in FP7, Horizon 2020, Horizon Europe

Description of your organisation: Disaster management can and should benefit from technological developments and in particular from the digital transformation! To achieve this, we believe that the increasingly unmanageable technological potential must be brought into line with the changing needs of the disaster management. This is our vision, which we have shared since at least 2009. Since then we worked together in national and international projects to bring our ideas into practice. Integrating the practice of fire brigade, order enforcement office, rescue service, public safety answering point, etc. of a rural district and a large city belonging to the district, allows us to represent a typical constellation within the disaster management process.
