

EIT Food InfraBooster

Unlocking the hidden value of European research infrastructures

Why should you apply?

Do you work (or plan to work) at a university or research institute that owns commercially relevant agri-food research infrastructure which remains underutilized or unused? Are you wondering how to capitalize on these assets by leveraging them for commercially oriented science-industry collaborations? If so, the **EIT Food InfraBooster Foundation** training is for you!

What is EIT Food InfraBooster Foundation?

EIT Food InfraBooster is a **modular training program** designed for **representatives of scientific organizations** that own agri-food research infrastructures.

By participating, you will:

- Leverage your existing assets, including commercially relevant research infrastructures, research teams' skills, and knowledge.
- Strengthen collaboration with industry, increase international exposure, and enhance the innovativeness of your institution.
- Establish new revenue streams by offering services to businesses.

InfraBooster Foundation is the **initial level** of educational modules and serves as a stepping stone to the **advanced InfraBooster Practitioner** training. It ensures that participants adopt a standardized vocabulary and gain a solid understanding of how agri-food research infrastructures can be leveraged for science-industry collaboration. The training also helps participants identify and select the most commercially relevant infrastructures to support private-sector R&D.

Who are we looking for?

EIT InfraBooster Foundation welcomes **participants from diverse scientific and educational backgrounds**. The recruitment and selection process is inclusive, and no prior specialized technological or marketing knowledge is required. The training is open to participants from countries covered by the [EIT Regional Innovation Scheme \(RIS\)](#), **Horizon Europe Associated Countries** and **Outermost Regions**.

How will EIT Food InfraBooster Foundation be delivered?

The Foundation level is organized in 2025 under the **rolling admission!**

The training is delivered 100% **self-study** and **online**. It is run by educators from the University of Warsaw.

The entire program is conducted in **English** – at least a working knowledge is required.
